boatboard

is a special grade HDPE for use in marine environments.

A High density polyethylene with a special textured surface on both sides and excellent UV resistance. Recognized for superior flatness and low inherent stress, NUVEX® BoatBoard sets the standard for fabrication ease among weather resistant polymer sheet products for outdoor applications. Proven uses include marine components, outdoor cabinetry and other structures. Available in standard and custom marine colours, this highly UV resistant material has a durable matte finish that cleans easily and looks great long term.

Key Features & Benefits

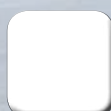

- Weather resistant
- Easy to handle
- Low maintenance
- Easy to clean
- Attractive surface, no moisture absorption (water resistant)
- No delamination
- No rotting (compared to pressed wood)
- Resistant to UV (no bleaching)
- Good machinability & weldable
- FDA approved

Applications

- Bow Pulpit
- Counter tops
- Frames & Trim
- Furniture
- Grab Rails & Handles
- Hatches & Doors
- Tray Tables
- Rod & Cup Holders
- Dock Steps & Boxes

Standard Colours

White

Polar White

Seafoam

Sunshade

Black

The lightweight rigid pvc foam board carefully manufactured for colour & consistency!

EX-CEL FOAMBOARD is a sheet with a smooth hard satin surface with a foam core resulting in a material with improved strength. Foam PVC sheets can be easily worked using conventional wood working equipment.

EX-CEL FOAMBOARD is free of Lead, Cadmium and Barium metals and the perfect choice for a large range of marine applications.

- Solid white
- Weight: 24 x 12 x 16 – 28kg
(MDF Comparison weight: 24 x 12 x 16 – 34kg)
- Semi gloss satin finish

Available Size:

- 2440mm x 1220mm x 6mm
- 2440mm x 1220mm x 9mm
- 2440mm x 1220mm x 12mm
- 2440mm x 1220mm x 16mm
- 2440mm x 1220mm x 18mm

*The Perfect Alternative To Traditional
Timber Construction Materials*

If you are building, designing or maintaining a boat or ship, our NUVEX® range of marine sheet products will accommodate any outdoor marine application that requires a high quality UV Polymer marine product.

If you are looking for a particular part for your marine project, our machine facilities are fully equipped to both design and machine to your specific requirements.

Our Nuvex marine products are made from the highest quality polymers and have been manufactured in the US. Don't take the chance with inferior Asian imported plastic that may buckle and fade over time; your boat is worth more than that!

Please contact your local Nuvex Product specialist for more information about these products.
